Domes Looking Good

With the increased interest in residential and high end commercial video, Speco goes beyond basic housing colors of black, white or silver with our unique Chameleon Cover.

The challenge: Make the camera 'blend in' with the environment, create a visually pleasing result in high end applications.

The solution: A snap on cover that converts the housing from the standard dark grey to decorator white, or can be painted or otherwise matched to any décor without painting the actual camera housing. The cover can be given to the end user in advance to be painted at the same time as the background in a new installation, or color matched and snapped on at the installer or end user's convenience after the camera setup is complete.

The products: At this time, the Chameleon cover will be included with the Intensifier HT-7246IHR, CVC-647TP and HT-647HRTP.
